VIDYA VIKASAM

Boosting learning levels of early-grade students

VIDYA VAHINI

Co-curricular activities in Govt High Schools

In many government schools in tribal regions, academic learning is not enough. Vidya Vahini was born out of a vision to nurture creativity, character, and confidence among rural children through:

- Career guidance sessions
- Recognition and felicitation of merit students
- Co-curricular and extracurricular competitions at intra- and inter-school levels,

we aim to uncover hidden talents and build the personality of each child, preparing them for a brighter future.

🎯 Your donation can help us organize events, supply learning materials, and train facilitators.

In the rural heartlands, most families are engaged in farming and daily wage labor. Parents—often illiterate and overwhelmed with survival needs—have little time or resources to support their children's education.

Vidya Vikasam addresses this critical gap by:

- Providing after-school academic support
- Offering mentorship and life skills training
- Creating a safe space where children are guided, heard, and nurtured

We believe early intervention is key to ensuring these children grow into responsible, empowered citizens—and not fall prey to antisocial influences.

🎯 Your support helps fund community tutors, basic infrastructure, and engagement activities.
